Software

Verification (1:1)

It ensures online or offline comparison of the card and/or database biometrics data from a person's personnel or Republic of Turkey ID card by means of a contactless reading method with the data received from an instant camera and/or from fingerprint sensors.

Identification (1:N)

It ensures online or offline comparison of the card and/or database biometrics data from a person's personnel or Republic of Turkey ID card by means of a contactless reading method with the data received from an instant camera and/or from fingerprint sensors. The list of candidates matched by biometrics type is shown according to the scores. It is also possible to see all matching details on the candidates list.

Verification (Turnstile)

It ensures online or offline comparison of the card and/or database biometrics data from a person's personnel or Republic of Turkey ID card by means of a contactless reading method with the data received from an instant camera and/or from fingerprint sensors. Front card authorization checks are ensured to accelerate the transition and a liveness check to maximize security.
