Secure Solution**

User Interface

We make biometric passing systems more reliable and faster with artificial intelligence and environment analysis.

Software

Management and Reporting

With the Management application, control of the cabins and all users entering and exiting the cabins is ensured. Users will be able to log in with the access permission provided by the administrators and authorized persons. Which cabin a user can enter or which users can enter a turnstile/door in which time period; all these are under supervision and control. In addition, access to information regarding all environment components relating to passing can be provided at the turnstile/door endpoint.
